Top Stories

Company Update | United Tractors (UNTR IJ/**BUY**/Rp23,500/Target: Rp30,000)

Page 2 →

- UNTR raised 2026 OB removal and coal production guidance by 7.9% and 8.0% to 1,025m BCM and 146mt respectively, following the national RKAB increase to 700mt. Martabe's output is expected to recover from operational disruptions, rising to 80,000-100,000 oz in 2027 and 200,000 oz by 2029. While ongoing buybacks may support the share price, it raises the risk of UNTR being excluded from the MSCI during the November review. Maintain BUY with a target price of Rp30,000.

Technical Analysis

Bank Central Asia | BBCA IJ

Page 5 →

- Trading Buy Range: We have a technical Buy at Rp5,100, and take profit at Rp5,525.

Merdeka Battery Materials | MBMA IJ

Page 5 →

- Trading Buy Range: We have a technical Buy at Rp310, and take profit at Rp330.

Disclaimer: In Traders' Corner, technical analysis is carried out purely based on charting patterns, price movements and trends, and is thus independent of the fundamental research views of our analysts. As a result, and from time to time, we may make a technical recommendation that is opposite to our fundamental BUY/HOLD/SELL rating.

United Tractors (UNTR IJ)

Improved 2H26 Outlook On Higher Coal Quotas

Highlights

- **MSCI exclusion risk likely priced in, while buybacks provide support.** UNTR has outperformed the JCI by 20.3% ytd, supported by ongoing share buybacks. Despite the possibility of being excluded from the MSCI during the Nov 26 review, this risk appears largely priced in.
- **RKAB uplift and gold volume growth provide long-term catalysts.** Higher RKAB quotas provide near-term mining contracting growth, while Martabe's gradual production ramp-up towards its normalised 200,000 oz by 2029 provides a longer-term earnings catalyst.
- **Maintain BUY with an SOTP-based target price of Rp30,000**.

Analysis

- **2026 guidance raised on higher RKAB allocations and dry-season productivity.** The national coal work plan and budget (RKAB) was revised upward in Aug 26 from 600mt to 700mt (+16.7%), although this remains below 2025's production of 820mt. PAMA's clients have adjusted their production targets in line with the additional quotas. Consequently, 2026 overburden (OB) removal guidance was raised from 950m BCM to 1,025m BCM (+7.9%), while coal production guidance was increased from 135mt to 146mt (+8.0%), bringing the stripping ratio from 7.03x to 7.02x. 4Q26 OB removal is expected to decline slightly qoq as the rainy season begins, but still remain above 2Q26 levels. Tuah Turangga Agung's (TTA) RKAB was also revised upward from 7.5mt to 12.4mt, with the additional quota granted in Aug 26. However, TTA's coal sales target remains unchanged at 10mt, as deliveries remain dependent on river water levels, with low levels during the dry season having constrained barging activities. Guidance for Komatsu, gold and nickel remains unchanged.
- **Expect a recovery in gold volume in 2027.** 2026 gold production guidance remains unchanged at 82,000 oz, comprising 65,000 oz from the Martabe gold mine and the remainder from Sumbawa Juta Raya. Following operational disruptions during Jan-May 26, Martabe's production is expected to gradually ramp up towards its normalised level, reaching 80,000-100,000 oz in 2027, 150,000 oz in 2028 and 200,000 oz in 2029. Cash costs, excluding royalties, currently stand at US$2,600/oz at prevailing production levels, but UNTR expects these to roughly halve to US$1,300/oz once production reaches 200,000 oz. The ramp-up in 2027 is contingent on the new tailings facility, with the permit already received in Oct 26, while the filtration plant and dry tailings facility are targeted for completion in 3Q-4Q27. Meanwhile, the Doup gold project carries a total capex of US$400m. Approximately US$20m had been spent as of Sep 26, with US$60m expected to be spent in 2026, primarily on land acquisition and basic infrastructure. Capex is expected to be incurred in 2027-28 for the carbon-in-leach (CIL) processing plant, with operations targeted to commence in 2029.

Net Margin (%)	10.5	1.1	10.9			11.4	4.9	

Source: UNTR, UOB Kay Hian

- **3Q26 earnings recovery supported by stronger operating performance.** UNTR's core net profit increased 48.4% qoq to Rp3.7t in 3Q26, supported by higher OB removal and coal production, stronger Martabe gold sales, and improved Komatsu sales. Mining contracting margins also improved, benefitting from higher operating volumes, rupiah depreciation against the US dollar, and drier weather conditions. However, 9M26 core net profit declined 31.4% yoy to Rp7.9t, accounting for 90% of consensus and 87% of our forecast.
- **Aggressive buyback; planning for treasury share cancellation.** UNTR announced a fifth buyback programme of up to Rp2t for Oct-Dec 26. UNTR also plans to cancel its treasury shares in the near term. As of Oct 26, treasury shares accounted for 8.22% of its issued shares, further reducing its free float and increasing the risk of exclusion from the MSCI during the 11 Nov 26 review. However, we believe this risk may already be priced into the share price.

Valuation/Recommendation

- **Maintain BUY with a higher SOTP-based target price of Rp30,000 (from Rp27,500).** The upward revision of the national coal RKAB from 600mt to 700mt is expected to drive higher demand for mining contractors, supporting a 7.9% increase in OB removal guidance from 950m BCM to 1,025m BCM. We see further upside potential from stronger operational performance in 2H26.

Earnings Revision/Risk

- **We revise 2026 and 2027 core earnings by 18.0%/5.8% respectively.** We increase 2026-27 OB volume by 13.4%/6.0% and coal production by 16.8%/16.6% respectively.
- Key risks: a) Gold price movement, b) longer-than-expected coal RKAB approval for 2027, and c) heavier-than-expected rain in 4Q26.

Earnings Revision

Bank Central Asia
BBCA IJ

Technical BUY with 8% potential return

Resistance:	Rp5,350, Rp5,550
Support:	Rp4,980, Rp4,900
Stop-loss:	Rp4,820

Share price closed higher and formed a neutral candlestick. Price formed a bullish gap up pattern; hence, we see potential for more rallies ahead and challenge the resistance at Rp5,350 and Rp5,550. Technical indicator RSI is sloping upwards and away from its oversold zone, while the Stochastic has just given a bullish signal and moved out of its oversold zone. Buy at Rp5,100 and take profit at Rp5,525.

Approximate timeframe: 2-4 weeks.

Our institutional research has a fundamental BUY and target price of Rp8,150.
