Company Update | XLSMART Telecom Sejahtera (EXCL IJ/**BUY**/Rp1,520/Target: Rp3,600)

Page 2 →

- We maintain BUY with an unchanged target price of Rp3,600, pending further assessment following 3Q26 results and the earnings call. EXCL's 3Q26 earnings could remain under pressure from weaker mobile revenue trends, although integration costs and accelerated depreciation are nearly fully recognised. Its improving 5G network quality, faster speeds and extensive spectrum portfolio could strengthen its competitive position and attract higher-value subscribers. As merger costs taper and US$250m-300m synergies materialise, EXCL could follow ISAT's post-merger re-rating path.

XLSMART Telecom Sejahtera (EXCL IJ)

Expect Weak 3Q26 With Earnings Recovery Ahead

Highlights

- **Post-merger charges are nearing completion, but weaker mobile trends remain a headwind.** Lower integration costs and accelerated depreciation should support earnings normalisation towards the end of 2026.
- **Superior network quality strengthens EXCL's 5G positioning.** Faster speeds and an extensive spectrum portfolio could attract higher-value subscribers.
- **Maintain BUY** with an unchanged target price of Rp3,600, pending 3Q26 results and the earnings call.

Analysis

- **3Q26 earnings remain pressured, but post-merger charges are nearing completion.** The broader mobile revenue environment remains challenging as both Telkom Indonesia (TLKM) and Indosat (ISAT) recorded qoq declines in cellular revenue in 3Q26, reflecting softer subscriber trends and pressure on new spectrum monetisation. XLSMART Telecom Sejahtera (EXCL) could face similar headwinds, although integration costs should decline to around Rp300b in 2026, down 87% from 2025. Accelerated depreciation is also expected to decline, with approximately Rp1.5t-2t remaining for the year and the bulk of the charges expected to be recognised by 3Q26. This should bring EXCL closer to the end of its post-merger restructuring phase, although reported earnings may remain pressured by the remaining charges.
- **Superior network quality could distinguish EXCL and attract higher-value subscribers.** Industry checks indicate EXCL was among the early movers in 5G rollout, adopting a nationwide blanket-coverage strategy ahead of peers. Its network has also received independent recognition, winning four Ookla Speedtest Awards in 1H26, including Best 5G Network and Fastest 5G in Indonesia. Opensignal's Jul 26 report showed EXCL's 5G download speed at 135.4 Mbps, ahead of Telkomsel (87.8 Mbps) and ISAT (48.1 Mbps). EXCL also holds an extensive spectrum portfolio, recently securing the largest 700MHz allocation of 30MHz and another 50MHz in the 2.6GHz band. Its early 5G expansion and network readiness could help attract new customers, particularly those seeking higher-speed connectivity, while differentiating EXCL from competitors.

Company Description

A telecommunications service provider, with cellular and mobile internet services as its main businesses.

- **EXCL may follow Indosat's post-merger re-rating path.** ISAT's share price began re-rating meaningfully once EBITDA margin rose from 40.3% in 1Q22 to 44.1% by 4Q22, supported by stronger synergy execution and improved guidance for 2023. EXCL is showing improving profitability trends as merger costs taper, ARPU is continuing to recover and capitalising on synergies of US$250m-300m. During the 2Q26 earnings call, management maintained its 2026 guidance for revenue growth to remain in line with the industry at mid- to high single-digits, and for EBITDA growth to be at roughly double the rate of revenue growth.

Valuation/Recommendation

- **Maintain BUY with an unchanged target price of Rp3,600,** based on 5.8x 2026F EV/EBITDA, representing a 0.5SD discount to its post-merger average multiple. We await 3Q26 results and the earnings call for further clarity on operating trends and synergy realisation, before we revisit our model.

Earnings Revision/Risk

- **Earnings revision:** None as we are waiting for 3Q26 results and earnings call.
- **Downside risks:** a) Weaker-than-expected ARPU recovery; b) unfavourable changes in regulation; and c) longer-than-expected merger duration.

Share Price Catalyst

- Proper EBITDA margin improvement.
- Sinarmas Group acquiring a higher stake in EXCL.
