Analysis

- **Higher ASP drives stronger 3Q26 results.** Indo Tambangraya Megah (ITMG) recorded 3Q26 net profit of US$56.9m (+43.7% yoy; +10.9% qoq), supported by higher coal prices and sales volume. Revenue increased 19.5% qoq to US$600.9m, driven by a 12.0% increase in ASP to US$93.9/t and 6.7% higher sales volume to 6.4mt. However, net profit growth was partly offset by a US$19.2m impairment of property, plant and equipment and a higher effective tax rate of 38.9%. Consequently, 9M26 net profit rose 24.8% yoy to US$162.9m, on 17.0% revenue growth to US$1.6b and 36.4% operating profit growth to US$245.4m. Against our 2026F estimate of US$237m, 9M26 earnings achieved 68%, below our forecast, although adjusted earnings excluding the one-off impairment would have reached US$182m, or 77% of 2026F estimates.

Company Description

ITMG is a high CV coal producer with 335Mt coal reserves and annual production of 20-23Mt. The company is a subsidiary of Banpu Group of Thailand.

- **NPR and GPK to offset IMM's gradual decline.** ITMG continues to strengthen its core mining operations through the development of new mines, with Nusa Persada Resources (NPR) in Central Kalimantan commencing its first coal production this year. NPR is expected to resume production in 2027 at 1mt, before gradually ramping up towards its 6mt per annum capacity, while Graha Panca Karsa (GPK) has a potential capacity of 6-8mt per annum. Combined output could reach 12-14mt per annum, more than offsetting Indominco Mandiri's (IMM) production decline from the current 7 mt to 4 mt from 2028. However, ITMG has not provided a timeline for reaching full capacity, while GPK's lower-CV coal could dilute the sales mix and ASP. Meanwhile, NPR is expected to further diversify ITMG's coal portfolio by adding medium- to high-CV coal.
- **Continued buyback programme.** ITMG announced an interim cash dividend for 2026, with payment scheduled for 18 Nov 26 and a recording date of 12 Nov 26 with a yield of 4.8%. Separately, ITMG launched a share buyback programme of up to Rp2.31t, funded through internal cash, for the period of 5 Nov 26 to 4 Feb 27. ITMG's treasury shares have reached 7.24% of its total shares, with the combined treasury shares from previous and current buyback programmes subject to a regulatory ceiling of 20% of paid-up capital. The proposed buyback is expected to enhance shareholder returns, with the company's pro forma analysis indicating an increase in EPS from US$0.095 to US$0.103 and ROE from 11.1% to 11.9% upon full execution.
- **US dollar earnings provide a natural hedge against rupiah depreciation.** Stronger oil and LNG prices, driven by winter demand and prolonged US-Iran tensions, should support earnings through a higher coal price environment, while ITMG's solid cash position provides room for dividend distributions. However, the planned SOE-led export centralisation could pose downside risks to realised selling prices.

Valuation/Recommendation

- **Maintain HOLD with a higher target price of Rp25,800** (from Rp24,000), based on the five-year average SD 2026 EV/EBITDA. We revise our rupiah assumption from Rp17,500 to Rp18,000, despite lowering our earnings estimates. The ongoing share buyback programme and elevated coal prices provide positive near-term catalysts for ITMG. However, uncertainty surrounding the 2027 coal RKAB and planned export centralisation remain key downside risks.

- **Earnings revision:** We revise down 2026F and 2027F net profit estimates by 5.8%/14.18% to include the one-time impairment of US$19.2m and lower coal price assumption for 2027.
- **Downside risks:** a) Weaker-than-expected coal price, b) El-nino distrupting delivery, c) higher forex impact on capex, and d) restructuring execution risk.

Share Price Catalyst

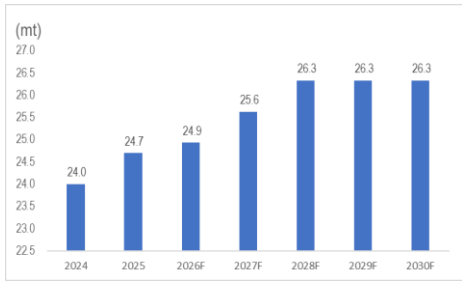

- a) Share buyback of Rp2.3t, b) winter season improving demand, and c) tight LNG supply.
